

SARO VILHELM YEKANIAN

Software Engineer

Yerevan, Armenia | (+374)77-82-88-73 | vilhelmsaro@gmail.com

[LinkedIn](#)

PROFESSIONAL SUMMARY

Backend software engineer with 5+ years of experience building scalable web applications, microservices, and bot-driven automation systems using Node.js, TypeScript, PostgreSQL, and cloud platforms (AWS, GCP). Proven track record in architecting RESTful and gRPC APIs serving 100K+ daily requests, designing serverless solutions, and integrating AI/LLM pipelines. Hands-on experience building Telegram bots with webhook-based architectures, content intelligence workflows, and real-time data processing across distributed systems.

TECHNICAL SKILLS

Languages & Frameworks: Node.js, TypeScript, JavaScript, React.js, Vue.js, Python, PHP, SQL

Backend Frameworks: NestJS, Express.js, FastAPI, Flask, Django, Laravel

Databases: PostgreSQL, Redis, MongoDB, MySQL

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP (Pub/Sub, Cloud Functions), Docker, LXD, Nginx, CI/CD Pipelines

APIs & Integrations: REST API, gRPC, Telegram Bot API, grammY, Webhooks, OpenAI API, Stripe API, HubSpot API, Cloudflare API, Chrome Extensions (Manifest V3)

Testing & Tools: Jest, Mocha, Git, BullMQ, Grafana, n8n

AI/ML: LLM Integration, Agentic AI Orchestration, Multi-Model Pipelines, RAG, pgvector, MCP (Model Context Protocol), Prompt Engineering, Tool Use / Function Calling, JSON Schema Validation

AI-Assisted Development: Claude Code, Cursor, Custom Agents, Context Engineering

PROFESSIONAL EXPERIENCE

Software Engineer | Armenian Artificial Intelligence Company | Yerevan 2025 – 2026

- Architected the full Node.js backend and PostgreSQL database schema from scratch, establishing project foundations for a greenfield AI product.
- Developed an agentic AI orchestration system coordinating multiple LLM pipelines for automated reasoning and task execution.
- Designed multi-model integration patterns enabling dynamic routing between AI providers based on task complexity and cost constraints.

Software Engineer | 10Web | Yerevan 2023 – 2025

- Delivered features across multiple product lines using Node.js, Express.js, and NestJS (TypeScript) with React.js on the frontend, contributing to both greenfield and legacy codebases.
- Integrated OpenAI/Gemini APIs via Python-based services to automate content workflows and enhance user-facing AI features across the platform.
- Optimized a critical SQL query from ~60 seconds to ~3 seconds (95% reduction), significantly improving reporting performance and user experience.
- Automated a large-scale client migration process serving 500+ users, replacing manual workflows and dramatically accelerating delivery of migration results.

Software Engineer | Esterox LLC | Yerevan 2021 – 2023

- Led backend development efforts, restructuring application architecture and improving API response times in Node.js (NestJS/Express), while also delivering client-facing features in Vue.js.
- Implemented end-to-end Stripe payment integration including real-time billing computations, webhook handlers, and subscription management.
- Established event-driven messaging with GCP Pub/Sub and HTTP-triggered Cloud Functions for asynchronous processing workflows, serving 100K+ daily requests.

PROJECTS

AI-Powered Telegram Bot | 2026 – Present

NestJS + grammY Telegram bot with webhook-based FSM conversation flows. Semantic search via PostgreSQL + pgvector with RAG across English, Russian, and Armenian. Async processing with Redis/BullMQ, multi-model LLM routing for cost-aware provider selection, and rate limiting with input sanitization.

n8n Document & Publishing Automation | 2025 – Present

Self-hosted n8n pipeline (Docker) that parses structured Word documents, transforms article content, and auto-publishes to WordPress via REST API. Orchestrates Mailchimp newsletter dispatch as a post-publish trigger, with retry logic and error handling across nodes.

EDUCATION

Bachelor of Science in Computer Science

American University of Armenia | 2017 – 2019

CERTIFICATIONS

- IELTS Certificate
- TestDome – JavaScript and Node.js

Languages: Armenian (Native) | English (Fluent) | Russian (Beginner/Intermediate)
